KHIZRA WASEEM

AI & FULL STACK DEVELOPER

Lahore, Pakistan | +92 326 5899615 | khizrabisma@gmail.com
github.com/1khizra | linkedin.com/in/khizra-waseem-842274262

PROFESSIONAL SUMMARY

AI & Full Stack Developer with practical experience in Machine Learning, Web Development, Mobile Application Development, and RESTful API integration. Completed a Web Development Internship at Punjab Information Technology Board (PITB), where I developed responsive web applications and worked with backend development, databases, and APIs. Developed a machine learning-based healthcare framework for diabetes detection, diabetes stage assessment, etiological type classification, and prediction of diabetes-related complications as a Final Year Project using Python, Scikit-learn, Streamlit, SQLite3, and Gemini API. Passionate about developing intelligent, scalable, and user-focused software solutions while learning modern technologies.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP (Core PHP), C++
Frontend Development: HTML5, CSS3, Bootstrap, React.js (Basic)
Mobile Application Development: Flutter, Dart
Backend Development: Core PHP, RESTful APIs
Machine Learning: Scikit-learn, Pandas, NumPy, Random Forest, Gradient Boosting, Joblib
Databases: SQLite3, MySQL
Tools & Others: GitHub, Postman, VS Code, Microsoft Office

PROFESSIONAL EXPERIENCE

Web Development Intern *Punjab Information Technology Board (PITB) | Jul 2025 – Sep 2025*

- Developed responsive web applications using HTML, CSS, Bootstrap, JavaScript, Core PHP, and MySQL.
- Built CRUD-based web modules with MySQL database connectivity.
- Integrated RESTful APIs and optimized application functionality.

PROJECTS

Machine Learning Based Diabetes Complication Prediction Framework *(Python, Streamlit, Scikit-learn, SQLite3, Pandas, NumPy, Joblib, Gemini API)*

Developed an AI-powered framework for diabetes detection, etiological type classification, and prediction of diabetes-related complications using clinical patient data. Trained machine learning models using Scikit-learn algorithms including Random Forest and Gradient Boosting. Built an interactive Streamlit-based interface for patient assessment and prediction. Integrated Gemini API to generate AI-assisted healthcare recommendations. Managed patient records using SQLite3 database.

PHP & MySQL Task Manager *(Core PHP, MySQL, HTML, CSS, Bootstrap)*

Developed a task management system with complete CRUD functionality. Connected PHP application with MySQL database. Built responsive user interface using Bootstrap. Implemented task creation, updating, viewing, and deletion features.

Flutter News App *(Flutter, Dart, REST API, HTTP)* — Cross-platform news app with NewsAPI integration, category-based filtering, and reusable widget architecture.

Secure Password Manager *(Python, Tkinter, SQLite3, Fernet Encryption)* — Desktop password manager with Fernet encryption, password strength checking, and full CRUD credential management.

EDUCATION

Bachelor of Science in Computer Science (BSCS) *University of South Asia, Lahore | 2022 – 2026*
CGPA: 3.36 / 4.00 | Final Year Project Grade: A

CERTIFICATIONS

Web Development Internship (PITB) • Introduction to Artificial Intelligence • Applications of Artificial Intelligence • Figma UI/UX Design • Figma for Beginners

ACHIEVEMENTS

- Developed an AI-powered healthcare prediction system as Final Year Project and achieved Grade A.
- Successfully completed Web Development Internship at PITB; built multiple end-to-end web, mobile, AI, and desktop applications.
- Maintained a public GitHub portfolio showcasing software development projects.
